

47 CONGRESO. del. M.C.E.P.

1 CONGRESO. VIRTUAL

Cuidando la Tierra

del 4 al 11 de Julio. 2020. LEÓN
del 7 al 11 de Julio. 2021. LEÓN

The Popular School Cooperative Movement (MCEP) organizes the 47th congress, the first virtual one, from the commitment with the “Care of the earth” and with the education for this care.

When in 2019, at the Huelva congress, we chose the central theme for this congress, “Caring for the Earth”, we did so from the need to address, in the different educational fields, the new challenges that climate change and the consequences that has for life on our planet. The reality of the pandemic has made more evident the need to change our behaviors of excessive growth of the exploitation of nature.

We want a school that, focused on life, is a healthy environment in which children and young people can develop their possibilities with the awareness of being responsible actors. We and we as teachers have the obligation to generate with them the conditions and experiences that allow them to lead a better future for humanity and for all life on the planet.

The Congress will take place from July 7 to 11 on the Zoom platform.

The objectives of this congress will be dealt with:

Ages Workshops:

- Workshop 0-8
- Workshop 8-12
- Workshop 12 and more

Thematic workshops, block 1:

- Educational Technology Workshop
- Coeducation Workshop

Thematic workshops, block 2:

- Body Workshop

EXPERIENCES

- "Sowing Life" (Floren Enríquez, Ecologists in Action)
- "Consuming school supplies without consuming the planet" (Javier Zarzuela Aragón, Teachers for Future Spain).
- "The New Culture of the Earth" (Fernando Cembranos, Ecologists in Action).

CONFERENCE AND TALK WITH Yayo Herrero

"VIRTUOUS" CONCERT

[Form of inscription \(in Spanish, sorry\)](#)

Information on the contents of the MCEP workshops at the 47th Congress

Age workshops:

- Workshop 0-8 years:

- The school immersed in Nature and the presentation of an outdoor experience.
- School gardens and a debate, Decalogue of good practices.

- Workshop 8-12 years:

- Rodari and the earth.
- Experiences of the Center for the care of the earth.
- Practical activities through 99 proposals from Ecologists in Action.
- Reflections on a New Culture of the Earth.

- Workshop 12 and over years:

- Presentation of experiences:

"Astronomical Museum". Xusa Alemany. With this experience, the aim is to share the work carried out in 1st year of ESO in the scientific-technological field

throughout the 2020-2021 academic year in a secondary school in Valencia.

The objective of this exchange will be to:

1. Share a possible working example.
2. Analyze the problems and virtues of this project and see what similarities we find with Freinet pedagogy.

- "Climate emergency and interdisciplinarity project". Mariquina Sánchez Ortiz.

Description of the project and Colloquium.

Debate: Resistance and possibilities of work by areas and co-teaching in secondary school. Brief information on Centers in process and Centers working in areas. Introduction by Juan M. Delgado.

- Coeducation Workshop

We propose to review the concepts that we have debated for a long time, their validity or their need to update, if applicable, such as: Personal identity, gender identity, coeducation, gender violence, sexist violence, diversity ...

- Body Workshop

The Body workshop vindicates the importance of the Body in the school. The activities for this congress are:

- Dynamics of body movements
- Cooperative games for pandemic times.
- I work with emotions.
- Share experiences.
- Reflection and debate on text.

- Educational Technologies Workshop

- Presentation of experiences: Classroom work with digital media.

- Debate:

- The environmental cost of digitization.
- Practical dynamics with applications for use in the classroom.
